ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms — children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by:

- sitting farther from the television screen,
- using a smaller television screen,
- playing in a well-lit room, and
- not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

AVOID DAMAGE TO YOUR TELEVISION

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set.

If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

LARA

At the age of nine, Lara survived a plane crash in the Himalayan mountains that led to the death of her mother. After miraculously surviving a ten-day solo trek from the crash site to Kathmandu, she spent the rest of her childhood under the close tutelage of her archeologist father - the late Earl of Abbingdon, Richard Croft.

At the age of 18, after the death of her father, Lara inherited the Croft estates and became Countess of Abbingdon. Since then she has been credited with the discovery of some 16 archeological sites of international significance.

Lara Croft has been hailed both as an Archeological Wunderkind and a glorified Treasure Hunter, depending on whom you listen to. There are thousands of rumors surrounding Lara's exploits, invariably involving the unexplained or outright unbelievable. Lady Croft herself is rarely available for comment, which further adds to the fog of mystery that surrounds her life and work.

Consequently, Lara Croft continues to be the focus of wild speculation and intense debate. Idealized and vilified in equal measure, she is perhaps one of the most fascinating and enigmatic figures of our times.

SAVING AND LOADING THE GAME

Press **D** during play to display the Pause Menu; from here you can save your progress and rewards, and load a saved game.

SAVING YOUR PROGRESS

Every game level has several checkpoints to pass. The word CHECKPOINT will appear in the bottom right of the screen to inform you when Lara has passed a checkpoint. This is a good place to save your progress. Press **D** to access the Pause Menu and select SAVE. From here you can choose to create a new save game or overwrite an existing save.

You can also save between checkpoints, but Lara will always appear at the most recently saved checkpoint when a save is loaded again.

NOTE: The game's Autosave feature always saves the last checkpoint of your current game. Starting a new game or loading a previously saved game automatically overwrites your Autosave.

COMBAT

COMBAT STRATEGIES

In combat, always remember these two key elements:

■ KEEP MOVING

Keeping Lara moving is the most important factor in combat; her continually changing position slows the enemy's advance. A moving target is much harder to hit than a static one.

■ MANIPULATE THE ENVIRONMENT

Constantly check for objects in the environment that Lara can manipulate to her advantage. For example, she can thwart enemies by blocking paths, collapsing structures, detonating nearby explosives and releasing obstacles.

AIMING AND FIRING CONTROLS

| | |
|-----------------------------------|-----------------------------------------------|
| L | Lock-on target. Hold to remain locked-on. |
| R | fire weapon. |
| • | Change target: flick ↑/↓/←/→ during lock-on. |
| Pull and hold L + • | Throw grenade at target. |
| | Grenade free throw: hold button for distance. |

MELEE ATTACKS

■ SLIDE ATTACK

Target enemies while running toward them, then press **B** to slide. Lara slides into enemies, knocking them off balance and setting them up for her guns.

■ AERIAL ATTACK

Press **A** twice when close to the enemy. With the first press, Lara jumps at an enemy. As she lands on the enemy, press **A** again to activate slow time, then immediately pull **R** to fire, shooting the target.

■ POWER KICK

Pull and hold **L** and press **Y** to kick the target enemy away with Lara's boot.

■ GRAPPLE

Pull and hold **L** and press **X** to use Lara's grapple to pull enemies toward her and inflict some damage.

NOTE: Melee attacks are ineffective against animal enemies.

DEFENSIVE COMBAT CONTROLS

While Lara is locked-on to a target, she can perform various maneuvers to avoid enemy attacks.

■ ROLL

Pull and hold **L**, press **L** in any direction and press **B**.

■ FLIP

Pull and hold **L**, press **L** in any direction and press **A**.

TARGETING

The targeting reticle will appear when a target is within sight.

The color of the reticle changes to indicate the target status:

■ GRAY RETICLE Target is out of range.

■ RED RETICLE Target is within range at the current distance.

■ BLUE RETICLE Target can be grappled.

TIP: If the target is within distance but off-screen, an arrow appears showing the direction of the target's location.

HUD (Head's-Up Display)

WEAPONS, ITEMS AND HEALTH

■ HEALTH BAR

The health bar gauge displays Lara's current health level. When Lara's health gets dangerously low, you need to replenish it using a health pack (page 13) if available.

■ USE ITEMS

(PLS, Health Pack, Binoculars) To use an item or gadget from Lara's inventory, press the corresponding direction on the directional pad:

- ▲ Health pack (use)
- ▼ Switch weapons (toggle)
- ◀ PLS (on/off)
- ▶ Binoculars (on/off)

PDA

The PDA is Lara's automatic data capture and wireless communication device. It holds all of her mission data and real time objective and equipment information. Press **O** to access Lara's PDA, which displays the following data:

- OBJECTIVES Provides Lara with information on her current objectives and overall mission objectives.
- DATA Provides information for completed missions, and allows you to keep a tally of rewards collected while playing the missions.
- COMPLETION TIME Records your fastest time for the Mission.
- COMPLETED TIME TRIAL Yes/No.
- GOLD REWARDS Shows number collected and total rewards available (of each type) in the Mission.
- SILVER REWARDS Shows number collected and total rewards available (of each type) in the Mission.
- BRONZE REWARDS Shows number collected and total rewards available (of each type) in the Mission.
- GEAR Provides Lara with information on all her inventory. Here you can view stats and descriptions of each weapon and item Lara has.

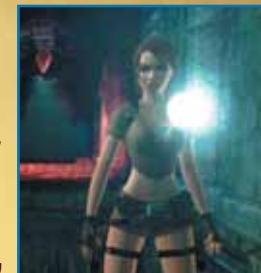

EQUIPMENT

HEALTH PACK

A staple of the rough-and-rugged adventurer, health packs allow Lara to treat her injuries in the field.

NOTE: Lara can carry a maximum of three health packs.

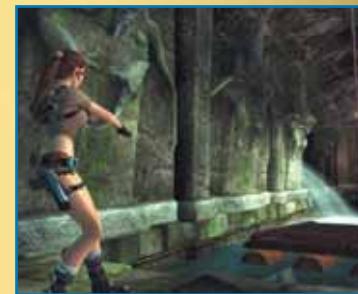

PERSONAL LIGHT SOURCE (PLS)

Ultra-bright LED portable light source. Kinetically charged, the PLS shines for a limited time before shutting off to recharge.

MAGNETIC GRAPPLER

Using her grapple, Lara can manipulate objects from a distance, climb or drop to different heights, and swing across large gaps. The grapple consists of a magnetic grapple head that can latch onto discrete, visually distinct surfaces, plus a lengthy wire and an automatic recoiler.

NOTE: The grapple can only be used on specific shiny metallic surfaces.

BINOCULARS/ REMOTE ANALYSIS DEVICE (RAD)

The RAD, a pair of high-tech lenses in Lara's inventory, perform the following functions:

- BINOCULARS Magnify the image in the field of view.
- RAD MODE Analyze and provide a readout for objects in view that have significant archeological or technological interest. Data collected include:

CHEMICALLY UNSTABLE

Object explodes given the right impulse.

TECHNICAL

Object is part of machinery large or small, ancient or modern, electronic or physical.

MOVABLE

Object can be moved, either with direct Lara interaction or by other means.

PHYSICALLY UNSTABLE

Object can be made to topple or break.

USING THE BINOCULARS/RAD

- Press **⊕ ▶** to activate the binoculars. (Press again to deactivate.) Pull and hold **R** or **L** to zoom in or out.
- Press **Y** to activate RAD mode. (Press again to deactivate.)

REWARDS

Throughout Lara's archeological adventure, various artifacts and relics become available for discovery and collection. Collecting rewards opens up bonus content and extra features such as outfits (which you can view in Croft Manor), pistol upgrades, concept art and much more. Make sure Lara scours the environment thoroughly.

Each mission has a number of different types of collectables:

- BRONZE REWARDS Informational content.
- SILVER REWARDS Game content.
- GOLD REWARDS Special game rewards.

NOTE: The most valuable unlockables are only obtained by collecting a combination of all three reward types. When each level is complete, you will be notified about which type of reward(s) you have managed to unlock. Select EXTRAS from the Main Menu to view and select your rewards.

TIP: Select REPLAY LEVEL from the Main Menu to replay completed missions and pick up missed rewards.
